

# BIOLOGICAL ABSTRACTS

A COMPREHENSIVE ABSTRACTING AND INDEXING JOURNAL
OF THE WORLD'S LITERATURE IN THEORETICAL
AND APPLIED BIOLOGY, EXCLUSIVE
OF CLINICAL MEDICINE

Volume 13 1939

Published (beginning with the literature of 1926) under the Auspices of the
UNION OF AMERICAN BIOLOGICAL SOCIETIES
With the Cooperation of Biologists Generally

Editorial and Executive Offices: University of Pennsylvania Philadelphia, Pennsylvania, U.S.A. RECEASING

## TABLE OF CONTENTS

General Biology

Philosophy of Biology: Entries 1-2, 1662-1665, 3406-3408, 5255-5256, 8868-8869, 10671-10677, 12461-12462, 14313

Microscopy, Instruments, Technique: Entries 3-4, 1666-1670, 3409-3411, 5257-5265, 7060-7068, 10678-10679, 12463-12467, 14314-14315, 16115-16125

Taxonomy and Nomenclature: Entries 5, 1671-1672, 3412, 5266-5268, 8870, 10680-10682, 12468, 14316, 16197

16126-16127

Explorations, Expeditions, etc.: Entries 6-8, 1673, 3413 Conservation and Nature Study: Entries 1674, 3414, 8871-8872, 10683-10686, 12469, 14317-14318

Museums, Botanical and Zoological Gardens, Aquaria, etc.: Entries 1675, 14319

Texts and Education: Entries 9-11, 1676, 3415, 5269-5270, 7069-7072, 8873-8880, 12470, 10687-10691, 14320, 16128

Miscellaneous: Entries 12-13, 1677, 3416-3419, 5271-5272, 7073, 8881-8885, 10692-10695, 12471-12475, 14321-14323, 16129-16131

Biography and History

History: Entries 14, 1678, 3420-3421, 5273-5275, 7074, 8886, 10696-10698, 12476, 14324-14325, 16132
Biography: Entries 15-30, 1679-1687, 3422-3432, 5276, 7075-7083, 8887-8895, 10699-10705, 12477-12487, iography: Entries 16074-1007

14326-14332, 10133-10147 **Bibliography:** Entries 1687A-1691, 3433-3437, 5277-5280, 7084-7089, 8896-8897, 10706-10710, 12488-12498, 14333-14338, 16148-16149 **Evolution:** Entries 34-35, 1692-1694, 3438-3443, 5281-5283, 7090, 8898-8902, 12499-12500, 14339-14342

General: Entries 36-39, 1695-1696, 3444-3447, 5284, 7091-

7092, 8903-8904, 10711, 14343-14344, 16150
Plant: Entries 40-50, 1697-1714, 3448-3451, 5285-5295, 7093-7109, 8905-8910, 10712-10721, 12501-12510, 14345-14348, 16151-16160

Animal: Entries 51-61, 1715-1733, 3452-3453, 5296-5300, 7110-7123, 8911-8920, 10722-10724, 12511-12513, 14349-14354, 16161-16165

Genetics

General: Entries 62, 1734-1737, 3454-3455, 5301-5305, 7124-7125, 8921-8923, 10725-10726, 12514-12516
Plant: Entries 63-85, 1738-1759, 3456-3459, 5306-5332, 7127-7134, 8924-8944, 10727-10733, 12517-12539, 14355-14365, 16166-16193

Animal (except man): Entries 86-97, 1760-1784, 3460-3468, 5333-5350, 7135-7160, 8945-8958, 10734-10740, 12540-12557, 14366-14374, 16194-16207

Man: Entries 1785-1803, 3469-3475, 5351-5359, 7161-7165, 8959-8966, 10741-10745, 12558-12561, 14375-14378,

Biometry: Entries 1804-1819, 3476-3480, 5360-5364, 7166-7173, 8967-8975, 10746-10750, 12562-12563, 14379,

General: Entries 103-110, 1820-1826, 3481-3490, 5365-5372, 7174-7175, 8976-8978, 10751, 12564-12565, 14380-14381

14380-14381

Bioclimatology, Biometeorology: Entries 8979-8992, 10752-10764, 12566-12571, 14385-14391, 16230-16248

Animal: Entries 111-114, 1827-1834, 3491-3499, 5373-12581, 14392, 16249-16250

Plant: Entries 115-133, 1835-1844, 3500-3518, 5379-5389, 7188-7219, 9008-9039, 10776-10791, 12582-12605, 14393-14394, 16251-16269

Oceanography: Entries 134-135, 1845-1850, 3510-3521

Oceanography: Entries 134-135, 1845-1850, 3519-3521, 5390-5393, 7220-7221, 9040-9041, 10792-10798, 12608, 14395-14397, 16270-16273

Limnology: Entries 136-140, 1851-1856, 3522-3527, 5394-5399, 7222-7234, 9042-9049, 10799-10804, 12609-12617, 14398-14404, 16274-16275

Wildlife Management—Aquatic: Entries 141-159, 1857-1876, 3528-3533, 5400-5412, 7235-7241, 9050-9062,

10805-10814, 12618-12632, 14405-14423, 16276-16285 Terrestrial: Entries 160-171, 1877-1882, 3534-3542, 5413-5424, 7242-7243, 9063-9071, 10815-10828, 12634-12635, 14424-14437, 16286-16289

Animal Physiology, Biochemistry and Biophysics

General: Entries 172, 1882A-1884, 3543, 5425, 7243A-7245, 9072-9074, 10829-10832, 12643-12645, 14439-14441, 16290-16292

Osmotic and Colloidal Behavior; Electrolytes: Entries 173-183, 1885-1888, 3544-3553, 5426-5437, 7246-7258, 9075-9086, 10833-10848, 12646-12659, 14442-14445, 16293-16307

Enzymes and Catalysts: Entries 184-198, 1889-1899, 3554-3567, 5438-5466, 7259-7277, 9087-9100, 10849-10858, 12660-12683, 14446-14461, 16308-16

Light and Heat: Entries 1900-1904, 3568-3571, 54 7278-7280, 9101-9105, 12684-12690, 14462-1 16315-16318

Electricity, X-Ray, Radium: Entries 199-205, 1905-1, 3, 3572-3579, 5470-5476, 7281-7283, 9106-9107, 10859-10861, 12691-12705, 14464-14475, 16319-16327

Oxidation and Reduction: Entries 206-208, 1909-1910, 5477-5479, 7284-7286, 9108-9109, 12706-12711, 14476-14479, 16328-16332

Methods and Apparatus

Biochemical and Biophysical: Entries 209-228, 1911-1943, 3580-3595, 5480-5493, 7287-7316, 9110-9131, 10862-10871, 12712-12733, 14480-14485, 16333-

10555 hysiological: Entries 224-243, 1944-1949, 3596-3614, 5494-5499, 7317-7328, 9132-9138, 10872-10878, 12735-12741, 14486-14492, 16387-16397 Physiological:

Blood and Body Fluids: Entries 244-259, 1950-1999, 3615-3656, 5500-5517, 7329-7396, 9139-9158, 10879-10944, 12742-12771, 14493-14516, 16398-16442

Nutrition, Diet, Vitamins, General Metabolism, Growth Metabolism, General: Entries 260, 2000-2004, 3657-3659, 5518-5523, 9159-9161, 10945-10947, 16443-

Food and Nutrition: Entries 261-272, 2005-2013, 3660-3661, 5524-5528, 7397-7406, 9162-9178, 10948-10961, 12772-12792, 14517-14521, 16451-16466

Diet: Entries 3662

Energy Metabolism: Entries 273-288, 2014-2019, 3663-3670, 5529-5535, 7407-7413, 9179-9185, 10962-10971, 12793-12799, 14522-14527, 16467-16473 Water Balance: Entries 3671-3674, 7414, 14528

Water Balance: Entries 3671-3674, 7414, 14528
Protein Metabolism: Entries 289-296, 2020-2025, 3675-3681, 5536-5539, 7415-7427, 9186-9192, 10972-10976, 12800-12811, 14529-14532, 16474-16484
Carbohydrate Metabolism: Entries 297-300, 2026-2031, 3682-3691, 5540-5545, 7428-7434, 9193-9198, 10977-10985, 12812-12816, 14533-14539, 16485-16491
Fat Metabolism: Entries 301-306, 3692-3693, 5546-5547, 7435-7449, 9199-9202, 10986-10988, 12817-12822, 14540-14541, 16492-16496
Lipid Metabolism: Entries 3694-3700
Mineral Metabolism: Entries 307-310, 2032-2038,

Mineral Metabolism: Entries 307-310, 2032-2038, 3701-3704, 7450-7459, 10989-10993, 12823-12830, 14542-14552

Growth: Entries 2039-2052, 3705-3710, 5548, 7460-7465, 9203-9214, 10994-10995, 12831-12833, 14553-14556, 16497-16498

Vitamins (General): Entries 311-313, 2053, 3711-3712, 5549-5551, 7466-7470, 9216-9218, 10996-10997,

Vitamin A: Entries 314-321, 2054-2058, 3713-3719, 5552-5555, 7471-7474, 9219-9223, 10998-11006, 12834-12836, 14557, 16503-16509

12836, 14557, 16503-16509 Vitamin B Complex: Entries 322-324, 2059-2065, 3720-3730, 5556-5567, 7475-7484, 9224-9234, 11007-11012, 12837-12852, 14558-14564, 16510-16529 Vitamin C: Entries 325-341, 2066-2080, 3731-3737, 5568-5577, 7485-7490, 9235-9237, 11013-11020, 12853-12859, 14565, 16530-16536 Vitamin D: Entries 342-343, 2081-2085, 3738-3742, 5578-5580, 7491, 9238-9240, 11021-11024, 12860-12865, 14566-14567, 16537-16544 Vitamin E: Entries 344, 2086-2088, 5581-5582, 7492-7495, 9241-9242, 11025-11026, 12866-12869, 14568, 16545-16546

14568, 16545-16546

Vitamin K: Entries 7496-7498, 9243-9245, 11027, 12870-12871, 16547-16553

Digestive System and Digestive Secretions: Entries 345-365, 2089-2114, 3743-3770, 5583-5603, 7499-7526, 9246-9270, 11028-11041, 12872-12917, 14569-14586, 16554-16571

Respiration: Entries 366-373, 2114A-2116, 3771-3785, 5604-5608, 7527-7533, 9271-9276, 11042-11047, 12918-12928, 14587-14606, 16572-16585

Endocrinology: Entries 374-399, 2117-2130, 3786-3934, 5609-5651, 7534-7551, 9277-9391, 11048-11072, 12929-

12999, 14607-14654, 16586-16639 Cb Ical Mediators of Nerve Impulses: *Entries* 400-405, 2131-2133, 3935-3938, 5652, 7552-7557, 9392-9395, 11073-11085, 13000-13005, 14655-14666, 16640-16644

Widney, Urine, and External Secretions: Entries 406-411, 2134-2153, 3939-3953, 5653-5663, 7558-7573, 9396-9409, 11086-11094, 13006-13028, 14667-14673, 16645-16656

Reproduction and Lactation: Entries 412-429, 2154-2171, 3954-3978, 5664-5677, 7574-7604, 9410-9433, 11095-11114, 13029-13050, 14674-14689, 16657-16666

Reactions of the Organism as a Whole: Entries 430-436, 2172-2195, 3979-3999, 5678-5684, 7605-7627, 9434-9453, 11115-11122, 14690-14698, 16667-16676

Sense Organs: Entries 437-444, 2196-2217, 4000-4006, 5685-5689, 7628-7636, 9454-9471, 11123-11131, 5685-5689, 7628-7636, 9454-9471, 11123-11131, 13051-13060, 14699-14708, 16677-16682

Ophthalmology: Entries 7637-7649, 9472-9482, 11132-

11135, 13061-13067

Nervous System: Entries 445-466, 2218-2245, 4007-4037, 5690-5702, 7650-7672, 9483-9491, 11136-11145, 13068-13084, 14709-14738, 16683-16705

Motor Apparatus: Entries 467-474, 2246-2263, 4038-4054, 14709-14708, 14709-14708

5703-5708, 7673-7699, 9492-9506, 11146-11159, 13085-13098, 14739-14752, 16706-16720

Vascular System: Entries 475-506, 2264-2281, 4055-4100, 5709-5728, 7700-7734, 9507-9536, 11160-11208, 13099-13135, 14753-14782, 16721-16751

Pharmacology: Entries 507-556, 2283-2339, 4101-4173, 5729-5794, 7735-7814, 9537-9577, 11209-11262, 13136-13189, 14783-14866, 16752-16818

The Special Physiology, Pathology, and Anatomy of Infancy and Childhood: Entries 557-565, 2340-2351, 4174-4177, 5795-5797, 7815-7820, 9578-9580, 11263-11273, 13190-13194, 14867-14872, 16819-16827

Pathology

General: Entries 566-567, 2352, 13195-13196 Neoplasms: Entries 568-616, 2353-2375, 4178-4229, 5798-5814, 7822-7858, 9581-9600, 11274-11302, 13197-13235, 14873-14911, 16828-16887

13235, 14873-14911, 16828-16887
Inflammation and Infectious Diseases: Entries 617-629, 2376-2386, 4230-4239, 5815-5824, 7859-7868, 9601-9611, 11303, 13236-13248, 14912-14921, 16838-16907
Degenerative Diseases: Entries 630-631, 2387, 7869-7870, 9612-9614, 11304-11306, 14922, 16908-16910
Blood Diseases: Entries 632-649, 2388-2401, 4240-4257, 5825-5843, 7871-7889, 9615-9622, 11307-11336, 13249-13264, 14923-14936, 16911-16916
Avitaminoses and Other Deficiency Diseases: Entries 650, 2402-2403, 4258-4266, 5844-5850, 7890-7894, 9623-9628, 11337-11350, 13265-13275, 14937-14953, 16917-16926 16917-16926

Endocrinopathies: Entries 651-652, 2404-2406, 4267-429 5851-5864, 7895-7902, 9629-9664, 11351-11354, 1495 14981, 16927-16938

Nervous and Mental Diseases: Entries 653-655, 240, 2418, 4295-4299, 5865-5868, 7903-7918, 9665-966, 11355-11356, 14982, 16939-16953

Industrial Pathology and Hygiene: Entries 2419-242; 4300-4301, 5869-5878, 7919-7928, 9667-9670, 1135; 11372, 13276-13284, 14983-14995

Vertebrate Anatomy and Histology

General: Entries 2424, 4302-4307 Experimental Anatomy and Regeneration: Entrie 656-658, 4308-4309, 9671-9675, 11373-11376, 14996 14999

14999
Gross Anatomy (except primate): Entries 659-666 2425, 4310-4315, 5879-5880, 7929-7931, 9676-9686 11377-11382, 13285-13290, 15000-15002, 16954-1695 Hematology (incl. reticulo-endothelium): Entries 666; 2426-2428, 4316-4320, 5881-5886, 7932-7937, 9681 9682, 11383-11386, 13291, 15003-15005, 16960-1696 Vascular System (incl. lymphatics): Entries 668-676 2429-2433, 4321-4325, 5887-5891, 7938-7943, 9683 9687, 11387, 13292-13296, 15006-15009, 16965 Neurology: Entries 677-687, 2434-2437, 4326-4335, 5892 5893, 7944-7962, 9688-9689, 11388-11403, 13297 13301, 15010-15018, 16966-16979
Endocrine Glands: Entries 688-692, 2438-2442, 4336-4340 5894-5901, 7963-7972, 9690-9698, 11404-11417, 13302 13305, 15019-15026, 16980-16991

13305, 15019-15026, 16980-16991 Genito-urinary System: Entries 693-696, 2443-2444 4341-4343, 7973-7976, 11418, 15027-15029, 16992 16993

Skin and Its Appendages: Entries 697-701, 4344-4346 5902-5903, 7977-7979, 9699, 11419-11422, 15030 15034, 16994

Alimentary System: Entries 702-704, 2445-2450, 4347, 4359, 5904-5909, 7980-7983, 9700-9704, 11423-11427, 13306-13308, 15035-15041, 16995-16996

Respiratory System: Entries 705, 7984-7985, 9705, 13309

13310

Bones, Muscles, Joints, Fasciae: Entries 706-713, 2451 4360-4362, 5910-5916, 7986-7988, 9706-9708, 11428 13311-13313, 16997-16998

Technique: Entres 714-716, 4363-4364, 5917-5919, 7989-8002, 9709-9713, 11429-11432, 15042-15047, 16999-17003

Unclassified: Entries 717-718, 4365-4370, 5920, 8003-8006, 9714-9715, 11433, 13314-13315, 15048-15050

Physical Anthropology: Entries 720-728, 2452-2465, 4371-4376, 5921-5944, 8007-8031, 9716-9757, 11434-11440, 13316-13322, 15051-15058, 17004-17034

Vertebrate Embryology

Descriptive: Entries 729-738, 2466-2467, 4377-4384, 5945-5952, 8032-8039, 9758-9765, 11441-11447, 13323-13329, 15059-15071, 17035-17046

Experimental: Entries 739-759, 2468-2473, 4385-4393 5953-5962, 8040-8053, 9766-9774, 11448-11454, 13330-13337, 15072-15084, 17047-17053

Anomalies, Monsters, and Marked Variations in Development: Entries 760-764, 4394-4396, 5963-5967, 9775-9779, 11455-11461, 13338-13340, 15085-15089, 17054-17059

Invertebrate Embryology and Histology: Entries 765-771, 2474-2479, 4397-4401, 5968-5973, 8054-8064, 9780 9796, 11462-11470, 13341-13349, 17060-17066

Animal Production

General: Entries 772-782, 2480-2501, 5974-5975, 8065 11471-11474, 13350-13352, 15090-15091, 17067-17068

Animal Production: Entries 4402-4408, 5976-6003, 8066-8073, 9797-9811, 11475-11493, 13353-13357, 15092 15102, 17069-17083

Dairy Husbandry: Entries 9811A, 11494-11497, 13358-13362, 15103-15106, 17084-17087

Dairy Production: Entries 4409-4413, 8087-8092, 9818-

Dairy Industry: Entries 4414-4420, 6004-6011, 8074-8086, 9812-9817, 11498-11501, 13363-13385, 15107-15110, 17088-17092

Poultry: Entries 783-794, 2502-2514, 4421-4428, 6012-6025, 8093-8095, 9820-9825, 11502-11514, 13386-1338, 15111-15127, 17093-17113

Smaller Mammals, Fur, and Pet Stock: Entries 11515, 13389, 17114-17115

Animal Immunology

Animai immunology
General and Bacterial: Entries 795-931, 2515-2593, 44294533, 6026-6117, 8096-8163, 9826-9902, 11516-11566, 13390-13515, 15128-15167, 17116-17223

Blood Groups: Entries 932-939, 2594-2597, 4534-4536, 6118, 9903, 11567-11568, 13516-13527, 15168-15171, 17904, 17025

17224-17235

17224-17235
Lower Animals: Entries 940-941, 2598-2606, 4537-4542, 6119-6126, 8164-8168, 9904-9907, 11569-11570, 13528-13530, 15172-15173, 17236-17237
Parasitological: Entries 942-945, 2607-2609, 4543-4548, 6127-6130, 8169-8173, 9908-9913, 11571-11572, 13531-13533, 15174-15178, 17238-17241
Chemotherapy: Entries 2654-2667, 4549-4578, 6131-6157, 8174-8189, 9914-9941, 11573-11611, 13534-13554, 15179-15216, 17242-17283 15216, 17242-17283

Filterable Viruses, Bacteriophage, etc.

General: Entries 946-954, 2610-2631, 4579-4603, 6158-6166, 8190-8216, 9942-9955, 11612-11624, 13555-13589, 15217-15253, 17284-17288

Lower Animals: Entries 955-959, 2632-2635, 4604-4606. 6167-6173, 8217-8219, 9956-9957, 11625-11629, 13590-13596, 15254-15257

Bacteriology and Other Microbiology

Medical: Entries 960-966, 2640-2653, 4607-4632, 6174-6202, 8220-8245, 9958-9974, 11630-11641, 13597-13618, 15258-15269, 17289-17322

13618, 15258-15269, 17289-17322

Fungi Pathogenic for Man and Animals: Entries 967973, 4633-4646, 6203-6205, 8246-8252, 9975-9982.
11642-11648, 13619-13623, 15270-15272, 17323-17324

Clinical: Entries 8253-8276, 9983-10006, 11649-11673,
13624-13632, 15273-15290, 17325-17359

Public Health Bacteriology, Epidemiology and Sanitation: Entries 974-1007, 2668-2689, 4647-4670, 6206-6221, 8277-8316, 10007-10031, 11674-11718, 13633-13661, 15291-15354, 17360-17383

Infectious and Other Diseases of Lower Animals:
Entries 1008-1019, 2690-2718, 4671-4686, 6222-6256,
8317-8329, 11719-11757, 13662-13668, 15355-15391,
17384-17395

17384-17395

Food and Industrial: Entries 1020-1034, 2719-2733, 4687-Food and Industrial: Entries 1020-1034, 2719-2733, 4687-4697, 6257-6272, 8330-8337, 10032-10063, 11758-11774, 13669+13678, 15392-15400, 17396-17407

Dairy: Entries 1035-1042, 2734-2739, 4698-4700, 6273-6292, 8338-8342, 10064-10068, 11775-11783, 13679-13685, 15401-15404, 17408-17418

Soil: Entries 1043-1051, 2740-2744, 4701-4703, 6293-6296, 8343-8353, 10069-10072, 11784-11788, 13686-13690, 15405-15409, 17419-17442

General: Entries 1052-1063, 2745-2780, 4704-4721, 6297-

General: Entries 1052-1063, 2745-2780, 4704-4721, 6297-6326, 8354-8367, 10073-10094, 11789-11803, 13691-13714, 15410-15427, 17443-17474

Paleobotany: Entries 2781-2786, 4722-4727, 8368-8372, 10095-10102, 13715-13721, 15428-15432, 17475-17483

Systematic Botany

Algae: Entries 1064-1071, 2787-2794, 4728-4732, 6327-6335, 8373-8385, 10103-10107, 11804-11809, 13722-13726, 15433-15437

Fungi: Entries 1072-1083, 2795-2814, 4733-4742, 6336-6360, 8386-8409, 10108-10115, 11810-11831, 13727-13738, 15438-15471, 17484-17502

17503-17505

Bryophyta: Entries 1093-1095, 4748-4753, 6369-6373,

8417-8419, 11835-11846, 15476-15481
Pteridophyta: Entries 1096-1110, 2815-2819, 4754-4759, 6374-6376, 8420-8424, 11847-11850, 17506-17510

Spermatophyta General: Entries 2820-2821, 4760, 6377, 11852-11853, 15482-15483

Gymnospermae: Entries 1111-1112, 2823-2827, 4761-4762, 6378-6380, 8425, 10118, 11853A, 15484-15485, 17511-17513

Spermatophyta (Mixed): Entries 6381, 10119, 15486 Angiospermae (Mixed): Entries 2827A-2828A, 4763, 6382, 8426, 11854-11857

Monocotyledones: Entries 1113-1121, 2829-2842, 4766-4775, 6383-6395, 8427-8429, 10120-10123, 11858-11873, 13742-13749, 15487-15490, 17514-17516
Dicotyledones: Entries 1122-1145, 2843-2888, 4776-

4792, 6396-6429, 8430-8440, 10124-10156, 11873A-11900, 13750-13762, 15491-15510, 17517-17543

Floristics and Plant Distribution: Entries 1146-1163, 2889-2904, 4793-4802, 6430-6439, 8441-8444, 10157-10162, 11901-11911, 13763-13778, 15511-15516, 17544-17550

Morphology and Anatomy of Vascular Plants: Entries 1164-1172, 2905-2917, 4803-4814, 6440-6451, 8445-8451, 10163-10173, 11912-11931, 13779-13789, 15517-15526, 17551-17563

Agronomy

Onomy
Crop Science (Arviculture): Entries 1173-1214, 29182963, 4815-4855, 6452-6497, 8452-8477, 10174-10203,
11932-11958, 13790-13846, 15527-15572, 17564-17604
Soil Science (Edaphology): Entries 1215-1223, 29642976, 4856-4864, 6498-6504, 8478-8488, 10204-10213,
11959-11971, 13847-13863, 15573-15583, 17605-17621

Horticulture: Entries 1224-1281, 2977-3015, 4865-4880, 6505-6527, 8489-8517, 10214-10233, 11972-11995A, 13864-13920, 15584-15620, 17622-17642

Entres 1282-1312, 3016-3040, 4881-4901, 6528-6534, 8518-8553, 10234-10282, 11996-12015, 13921-13967, 15621-15683, 17643-17663 Forestry:

Pharmacognosy and Pharmaceutical Botany: Entries 1313-1349, 3041-3055, 4902-4909, 6535-6557, 8554-8564, 10283-10295, 12016-12055, 13968-13971, 15684-15696, 17664-17670

Plant Physiology, Biochemistry, and Biophysics General: Entries 6558

Absorption, Nutrition: Entries 1350-1354, 3056-3058, 4910-4915, 6559-6564, 8565-8567, 10298-10298, 12056-12062, 13972-13980, 15697-15702, 17671-17677

Auxins, Growth Hormones: Entries 1355-1362, 3059-Auxins, Growth normones: Entires 1505-1502, 5005-3067, 4916-4921, 6565-6579, 8568-8571, 10299-10307, 12063-12073, 13981-13990, 15703-15721, 17678-17688 Protoplasm: Entries 6580, 10308, 15722, 17689

Osmosis, Permeability: Entres 1363-1365, 3068-3078, 4922-4924, 6581-6582, 10309-10311, 13991-13996, 15723-15725, 17690-17691

15723-15725, 17690-17691
Germination, Dormancy: Entries 1366-1369, 3079-3081, 6583-6589, 8572-8573, 10312-10313, 12074-12075, 13997-14001, 15726, 17692-17698
Growth, Development: Entries 1370-1377, 4925, 6590-6593, 8574-8575, 10314-10316, 12076-12079, 14002-14006, 15727-15733, 17699-17707
Vitamins: Entries 1398-1399, 4926-4927, 15734-15739
Photoperiodism: Entries 1378-1379, 3082, 4928-4929, 6594, 10317-10318, 12080-12081, 15740-15742, 17708
Photosynthesis: Entries 1380-1381, 3083-3084, 4930-4034

Photosynthesis: Entries 1380-1381, 3083-3084, 4930-4934, 6595-6596, 8576-8577, 12082-12088, 14007-14010, 15743, 17709-17711

Transpiration, Translocation: Entries 1383, 4935-4941, 6597-6598, 8578, 10319, 12089-12091, 17712-17713

Water Relations: Entries 12092-12093, 15744-15749 Radiation effects: Entries 1384-1387, 4942, 6599-6601, 10320-10321, 14011-14013, 15751-15755, 17714-17715

Respiration: Entries 1388-1390, 4943-4944, 6602-6603, 8579-8581, 10322-10328, 12094-12097, 14014-14020, 15757-15760, 17716

Bioelectrical Effects: Entries 1391-1393, 3095-3096, 15756 Metabolism, General: Entries 1394, 6604, 15750, 17717 Carbohydrate Metabolism: Entries 1395, 6605, 8582-8586, 10329, 15761-15766, 17718-17720

Nitrogen Metabolism: Entries 1396-1397, 3085, 4945, 6606-6608, 8587-8590, 10330-10331, 12098-12100, 15767, 17721

Organic Acid Metabolism: Entries 15768-15770 Protein Metabolism: Entries 8591, 14021-14022, 17722-

Hardiness, Low Temperature Relations. Entries 1400-1402, 3086-3087, 4946, 6609, 14023-14027, 15771-15775

Ascorbic Acid: Entries 3088-3089
Pigments: Entries 1403-1404, 3090-3092, 4947, 6610-

6612, 10332, 12101-12102, 15776, 17724-17731

Enzymes: Entries 3094, 4948-4950, 6613, 8592, 10333-10335, 12103-12106, 14028-14032, 15777-15779, 17732

Tropism, Movements: Entries 1405-1406, 6614-6615,

15780 ity: Entries 1407-1410, 3097, 4951, 6616-6617, 10336-10337, 12107-12111, 15781-15782, 17733-17734 Toxicity:

Polarity, Gradients: Entries 1411, 3098, 4952, 15783 Apparatus, Methods: Entries 1412-1414, 3099-3100, 4953, 6618, 10338, 12112, 15784-15790, 17735-17737 Stomata: Entries 8593, 10339, 15791

Plant Constituents: Entries 3101-3104, 4954, 8594, 10340 Chemical Constituents: Entries 4955-4956, 6619-6620, 8595-8598, 12113-12116, 17738-17740

Regeneration: Entries 15792
Miscellaneous: Entries 1415-1416, 3105, 4957-4960, 6621-6626, 10341, 12117-12118, 14033-14035, 15793, 17741-

Phytopathology

Diseases Caused by Fungi: Entries 1417-1429, 3106-3114, 4961-4967, 6627-6636, 8599-8604, 10342-10353, 12119-12131, 14036-14050, 15794-15813, 17746-17762

Diseases Caused by Bacteria: Entries 1430, 3115-3117, 4968-4972, 6637-6640, 8605, 10354-10356, 14051-14066-147614-17

14056, 15814-15815, 17763-17765

Diseases Caused by Phanerogams: Entries 10366, 15816-15817, 17766-17767

Diseases Caused by Animal Parasites: Entries 1431-1433, 4973, 6641-6643, 8606-8607, 15818-15820, 17768-17774

Virus Diseases: Entries 1434-1444, 3118-3133, 4974-4982, 6644-6659, 8608-8616, 10357-10363, 12132-12141, 14057-14069, 15821-15834, 17775-17795

14057-14069, 15821-15834, 17775-17795
Non-Parasitic Diseases: Entries 1445-1448, 3134-3135, 4983-4986, 6660-6664, 8617-8622, 10364-10365, 14070-14077, 15835-15840, 17796-17808
Parasitism and Resistance: Entries 1449-1453, 3136-3143, 4987-4998, 6665-6675, 8623-8625, 10367-10371, 12142-12152, 14078-14089, 15841-15864, 17809-17827
Disease Control: Entries 1454-1475, 3144-3162, 4999-5011, 6676-6688, 8626-8630, 10372-10381, 12153-12161, 14090-14100, 15865-15883, 17828-17845
Miscellaneous: Entries 1476-1484, 3163-3169, 5012-5014, 6689-6691, 8631-8632, 12162-12169, 15884-15893.

6689-6691, 8631-8632, 12162-12169, 15884-15893, 17846-17851

Economić Entomology

General: Entries 1485-1488, 3170-3171, 10382-10387, 12170-12172, 14101-14102, 17852
Fruits: Entries 1489-1492, 3172-3179, 5015-5021, 6692-

6695, 8634-8639, 10388-10403, 12173-12180, 14103-14113, 15894-15898, 17853-17862

Field, Truck and Greenhouse Crops: Entries 1493-1501, 3180-3189, 5022-5046, 6696-6700, 8640-8646, 10404-10419, 12181-12204, 14114-14122, 15899-15908, 17863-17882

Stored Products: Entries 1502-1503, 3190-3192, 5047-5048, 10420-10421

Forest and Shade Trees: Entries 1504-1512, 3193-3199, 5049-5053, 8647-8654, 10422-10433, 12205-12209, 14123-14137, 15909-15912

Insects Affecting Animals: Entries 1513-1520, 3200-3203. 5054-5065, 6701-6708, 8655-8664, 10434-10445, 12210-12228, 14138-14143, 15913-15924

Biological Control: Entries 1521-1524, 3204-3209, 5066-5069, 8665-8669, 10446-10459, 12229-12231, 15925-15930

Insecticides and Apparatus: Entries 1525-1530, 3210-3215, 5070-5080, 6709-6714, 10460-10476, 12231A-12239, 14144-14149, 15931-15935, 17883-17889

Apiculture: Entries 1531-1537, 8670-8674, 14150-14154, 15936-15940

Sericulture: Entries 3216-3232, 8675-8679

Paleozoology: Entries 1538, 3233-3236, 5081-5084, 8680-8681, 12240-12242, 14155, 15941-15944

Parasitology (Animal): Entries 1539-1574, 3237-3253, 5085-5098, 6715-6759, 8682-8714, 10477-10513, 12243-12274, 14156-14195, 15945-15976, 17890-17924

Systematic Zoology Protozoa: Entries 1575-1588, 3254-3271, 5099-5105, 6760-6774, 8715-8724, 10514-10530, 12275-12288, 14196-14204, 15977-15980, 17925-17928 Porifera: Entries 6775-6776, 10531-10532

Coelenterata and Ctenophora: Entries 3272-3278, 6777-6780, 8725-8729, 10533-10535, 15981-15984 Platyhelminthes and Mesozoa: Entries 1589-1602, 3279-

3281, 5106-5111, 6781-6803, 8730-8734, 10536-10545, 12289-12302, 14205-14212, 15985-15992, 17929-17948

Nematoda and Nematomorpha: Entries 1603-1604, 3282-

3284, 8735-8739, 10546-10548, 14213-14218, 15993-16000, 17949-17961

Acanthocephala: Entries 3285-3286, 10549-10550

Rotatoria, Gastrotricha, Echinodera, and Chaetognatha: Entries 6804-6807, 14219-14222

Echinodermata: Entries 3293-3294, 5112-5113, 10551-10556, 14223-14227, 16004-16007
Nemertea: Entries 3287-3288, 12303-12304

Annelida: Entries 1605-1608, 3289-3290, 6808-6817, 12305-12308, 17962-17966

Brachiopoda, Bryozoa, Phoronidea

Brachiopoda: Entries 3291-3292, 6818-6819, 12309-12310, 16001-16003 Bryozoa: *Entries* 6820, 12311-12312

Mollusca: Entries 1609-1612, 3295-3305, 5114-5122, 6821-6828, 8740-8747, 10557-10567, 12313-12316, 14228-14232, 16008-16011

Myriopoda and Onychophora: Entries 5123-5124, 6829-6832, 8748-8749, 12317-12319, 16012-16014 Crustacea: Entries 1613-1616, 3306-3310, 5125-5126, 6833-

6849, 8750-8761, 10568-10575, 12319A-12337, 14233-14236, 16015-16022, 17967-17973 Entomology: Entries 3311-3312, 5127-5129, 6850, 8762-

8763, 10576-10578, 12338, 14237-14238, 16023-16026, 17974-17978

Acarina: Entries 1617-1618, 3313-3316, 6851-6856, 10579-10583, 12339-12341, 17979-17983

Arachnida (Except Acarina): Entries 3317-3321, 6857-6865, 10584-10588, 14239-14243, 17984-17988

Coleoptera: Entries 3322-3334, 5130-5134, 6865A-6888, 8764-8782, 10589-10597, 12342-12357, 14244-14250,

16027-16034, 17989-17999
Diptera: Entries 1619-1626, 3335-3340, 5135-5137, 6889-6908, 10598-10600, 12358-12376, 14251-14258, 18000-18011

Hemiptera and Homoptera

Hemiptera: Entries 1627, 3341-3344, 6909-6913, 8783, 10601-10602, 12377-12380, 14259, 16035-16036, 18012-18014

Homoptera: Entries 1628-1631, 3345-3349, 6914-6918, 8784-8786, 10603-10606, 12381-12383, 14260-14263, 16037-16039, 18015-18021

Hymenoptera: Entries 1632-1634, 3350-3354, 5138-5140, 6919-6930, 10607-10613, 12384-12390, 14264-14271, 18022-18032

Neuropteroids: Entries 3360-3364, 6937-6938, 12402-12410, 16045-16047

Orthopteroidea: Entries 3365-3366, 6939-6940, 14272-14276

Smaller Orders of Insecta: Entries 1635-1636, 3367-3371, 5146-5148, 6941-6944, 8796-8802, 12411-12416, 14277-14282, 18033-18039

Fossil Insecta: Entries 3372-3373, 6945, 5149-5150 Prochordata: Entries 6946

Cyclostomata, Elasmobranchii, and Pisces: *Entries* 1637-1639, 3374-3396, 5151-5163, 6947-6974, 8803-8819, 10619-10629, 12417-12431, 14283-14287, 16048-16056, 18040-18050

Amphibia and Reptilia

General: Entries 6975-6976, 14288

Amphibia: Entries 3396A-3398, 6977-6980, 8820-8821, 10630-10631, 12432, 18051

## TABLE OF CONTENTS FOR SECTION SUBSCRIBERS

Sectional subscribers will find this condensed table of contents useful in determining whether or not a given index number appears in their particular section.

### SECTION A

Entries 1-171; 1662-1882; 3406-3542; 5255-5424; 7060-7243; 8868-9071; 10671-10828; 12461-12635; 14313-14437; 16115-

## SECTION B

Entries 103-794; 1820-2514; 3481-4428; 5365-6025; 7174-8095; 8976-9825; 10751-11515; 12564-13389; 14380-15127; 16230-17115

### SECTION C

Entries 795-1063, 1539-1604; 2515-2780, 3237-3286; 4429-4721, 5085-5111; 6026-6326, 6715-6803; 8096-8367, 8682-8739; 9826-10094, 10477-10550; 11516-11803, 12243-12302; 13390-10094, 10477-10550; 11516-11803, 12243-10094, 10477-10550; 11516-11803, 12243-10094, 10477-10550; 11516-11800, 10477-10550; 11516-11800, 10477-10550; 11516-11800, 10477-10550; 11516-11800, 10477-10550; 11516-11800, 10477-10550; 11516-11800, 10477-10550; 11516-11800, 10477-10550; 11516-11800, 10477-10550; 11516-11800, 10477-10550; 11516-11800, 10477-10550; 11516-11800, 10477-10550; 11516-11800, 10477-10500, 10477-10500, 10477-10500, 10477-10500, 10477-10500, 10477-10500, 10477-10500, 10477-10500, 10477-10500, 10477-13714, 14156-14218; 15128-15427, 15945-16000; 17116-17474, 17890-17961

Alle Company of the C

## SECTION D

Entries 103-171, 1064-1484; 1820-1882, 2781-3169; 3481-3542, 4722-5014; 5365-5424, 6327-6691; 7174-7243, 8368-8633; 8976-9071, 10095-10381; 10751-10828, 11804-12169; 12564-12635, 13715-14100; 14380-14437, 15428-15893; 16230-16289, 17475-17851

## SECTION E

Entries 103-171, 1485-1661; 1820-1882, 3170-3405; 3481-3542, 5015-5254; 5365-5424, 6692-7059; 7174-7243, 8634-8867; 8976-9071, 10382-10670; 10751-10828, 12170-12460; 12564-12635, 14101-14312; 14380-14437, 15894-16114; 16230-16289, 17852-18055

Entered as 2nd class matter at the post office, Dec. 23, 1926, Baltimore, Maryland, under Act of Aug. 24, 1912. Published monthly during the months January to May, inclusive; bi-monthly, June to September, inclusive; monthly, October and November; semi-monthly in December.

Geological Index to Paleontological Material.

Subscription \$25 per volume domestic and foreign, postpaid. Checks should be made payable to Biological Abstracts.

# LATEX INJECTIONS

By TURTOX

Latex emulsion (liquid rubber) provides an injection medium for practically all forms which so far surpasses any medium previously used that it has already made starch and gelatine masses obsolete. A few of the characteristics which have made the Turtox Latex so outstanding are:

- 1. It flows freely into even the smallest vessels.
- Completely fills the vessels giving a "plumpness" not evident in other injections.
- 3. Sets to remain flexible and elastic.
- 4. Retains full, brilliant, non-fading color.
- 5. Will not stain or discolor surrounding tissue.
- 6. Not affected by formalin, alcohol or other preservatives.
- 7. Results equally fine in either embalmed or liquid preserved animals:
- 8. Provides a perfect, permanent cast of the blood vessels.
- Permits a freedom in dissecting that brings a much more accurate understanding of the circulatory system in less than one half the time required for dissection of other specimens.

Insist on Turtox Latex injected specimens. They cost no more than poorly injected animals.

# Latex Injected Invertebrates

In addition to the latex injected vertebrates commonly used, the latex injected invertebrates listed below are available for immediate shipment.

Starfish

Earthworm

Leech

Cravfish

(Cambarus & Astacus)

Lobster

Grasshopper

Fulgur

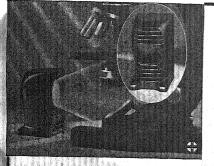

## GENERAL BIOLOGICAL SUPPLY HOUSE

Incorporated

761-763 East Sixty-Ninth Place, Chicago

The Sign of the Turtox Pledges Absolute Satisfaction

## New!

Operates continuously without becoming too hot to handle.

## ADAMS SCOPELITE .

Attractively moulded of durable, almost unbreakable Bakelite, it is cool and efficient in operation. Can be used either as a substage lamp (with mirror removed) or in front of the microscope.

The louvers, front and rear, cause a free circulation of cooling air throughout the lamp without loss of light, so that even after extended use, the lamp can be handled. The frosted daylight filter diffuses the light and gives uniform illumination approximating daylight.

# Patten CHICK EMBRYO MODELS

★ This series consists of seven models, namely the 18, 25, 30, 36, 44, 60 and 96 hour embryos. Each model is unusually accurate in detail with blood vessels and organ rudiments exposed in relief, in many instances almost in entirety. Certain minute details are east in metal and securely attached to the strong composition of the body resulting in models of superior strength and complete-

ness of detail. See our catalog No. 47 for further information or write for descriptive booklet.

## AVES

W. L. McATEE, Editor, General Ornithology

18056. BAUMGARTNER, FREDERICK M. Territory and population in the great horned owl. Auk 56(3): 274-282. 1939.—Field observations on the great horned owl, Bubo virginianus, at Lawrence, Kansas, and Ithaca, New York, demonstrated that the 33 maintain a definite territory throughout the nesting season. This range is seldom more than 1 mile in diam, and serves as the area in which both birds hunt for food. Resident owls are found near the nest site at all seasons of the year with the possible exception of a few months in the late summer and fall. Normally no other large species of owls are found within this territory. In optimum range the territorial requirements of the 33 limit the density of population to 1-3 pairs to the sq. mile. The limited range of the species throughout most of the year has an important bearing upon its economic status.-F. M. Baumgartner.

18057. BORIES, P. Un jeune Martinet. Oiseau 9(1): 144-145. 1939.—A young Martin, accidentally fallen from its nest, refused to take food at first, and had to be force-fed. Later, it opened its bill for food. It was not afraid of men or dogs. The bird began to fly 12 days after being found.—D. S.

Lehrman.

18058. CHAPIN, JAMES P. The birds of the Belgian Congo. II. Bull. Amer. Mus. Nat. Hist. 75(2): 1-632. 21 pl. (3 col.), 38 fig. 1939.—The present volume includes the families Rallidae to Picidae. For each species synonymy, description, and distribution are given. Keys to the larger

genera are provided.

18059. DEVITT, OTTO E. The Yellow Rail breeding in Ontario. Auk 56(3): 238-243. 1 pl. 1939.—The Yellow Rail (Coturnicops noveboracensis) was found widely distributed throughout the province of Ontario, occurring in suitable marshes from Lake St. Clair on the south to James Bay. While heard occasionally during the daytime, it became much more active just after sunset. The "voice" period extended at least from May 25 to July 27. A nest containing 7 eggs was found at Holland River Marsh, Simcoe County, on June 12, 1938, and is the first reported from Canada.— O. E. Devitt.

18060. FLEMING, C. A. Birds of Chatham Islands. 3. The shore plover. *Emu* 39(1): 1-15. 6 pl. (1 col.) 1939.— Thinornis novae-seelandiae has been recorded from many localities throughout the main islands of New Zealand, although never in large numbers; in 1888 apparently its extinction on the mainland had already begun, and in no subsequent writing is there an account of its occurrence. So complete and so early was this extinction brought about that it is difficult if not impossible to locate, in New Zealand collections, specimens from mainland localities. In view of the large number of shore plover on South East Island it is surprising that no colonization of the nearby parts of Pitt Island has occurred. At present the shore plover may be considered as being confined to South East Island. The courtship habits of the species follow the pattern of behavior common to many waders; a few of these traits are descr. All but one of the 17 nests examined were in some way sheltered from above and entered from the sides, and contained 2 or 3 eggs. General observations, sexual differences in plumage, construction of nest, coloration of eggs, young, and ecological factors descr.—P. A. Gilbert.

18061. FRIEDMANN, H., and H. G. DEIGNAN. Notes on

some Asiatic owls of the genus Otus, with description of a new form. Jour. Washington Acad. Sci. 29(7): 287-291. 1939. O. senegalensis distans, from northern Siam, related to African O. senegalensis; critical discussion of Asiatic forms of O. scops, O. spilocephalus, and O. bakkamoena.—H. Friedmann.

18062. GILBERT, P. A. The bower-painting habit of the satin bower-bird, Ptilonorhynchus violaceus. Emu 39(1): 18-22. 2 pl. 1939.—The remarkable habit of painting the sticks of the bower with fruit pulp is deser. Two fruits are specially used, the blueberry and Dianella berry. The methods adopted by the of satin bower-bird in applying fruit pulp to the walls of its bower indicate deliberation. An immature  $\delta$  and a  $\mathfrak P$  also were observed to paint.—P. A. Gilbert.

18063. GROMIER, E. Quelques observations ornithologiques. Oiseau 9(1): 142-143. 1 fig. 1939.—Note of the finding of a nest of the yellow bunting (Embenza citrinella), made of paper.—D. S. Lehrman.

18064. HALLER, L. Beobachtungen an der Tihanyer Kolonie des Fischreihers (Ardea c. cinerea L.). Arb. Ungarisch. Biol. Forschungsinst. 10: 45-51. 1938.

18065. HELLMAYR, CHARLES E. Catalogue of birds of the Americas and the adjacent islands. XI. Ploceidae-Catamblyrhynchidae-Fringillidae. Field Mus. Nat. Hist. Publ. 430. 13(6): 1-662. 1938.—This catalog of the family of the finches concludes the treatment of the American Passeriformes in the Field Museum series. Scientific and common names, synonymy, bibliographic references, geographic ranges, and localities of the specimens in the Field Museum are given for spp. and sspp. recognized by the author, with taxonomic descriptions in some cases. 110 genera are listed. Index. Fringillidae: Sporophila nigricollis vivida nom. nov. p.209.—S. H. S.

18066. HINDWOOD, K. A. Nectar-feeding birds near

Sydney. Emu 39(1): 40-44. 1 pl. 1939.—An annotated list of birds, chiefly honeyeaters and parrots, mostly observed feeding on the blossoms of the genus Eucalyptus.—P. A.

18067. HOMONNAY, N. Die Vögel der Halbinsel Tihany, unter besonderer Berücksichtigung der sich durch den natürlichen Aufbau der Halbinsel ergebenden Lebensräume der Vögel. Arb. Ungarisch. Biol. Forschungsinst. 10: 52-83, 1938. —On the basis of the breeding and feeding places of the birds, the Tihany peninsula is divided into 12 so-called bird-biochors. Each of these is composed of the various biotops of the birds. The breeding places of the various species are called their primary biotops, whereas the feeding places are the secondary ones. Each species may have several primary and secondary biotops of different importance and they may even occupy different biochors. The number of bird species observed in the peninsula was 168, of which 56 were observed breeding there.—A. Wolsky.

18068. HURSTHOUSE, E. W. Some observations on the breeding habits of the little penguin. Emu 39(1): 15-17. 1939.—The period of incubation was 38 days, shared by both parents. Young, methods of feeding, molt, and other aspects are dealt with, followed by a brief summary of dates and events.—P. A. Gilbert.

18069. KLEINER, A. On the importance of biotops in the bird-migration. (Observations at the waters of Trans-

danubia, Hungary.) Arb. Ungarisch. Biol. Forschungsinst. 10: 84-92. 1938.—Most of the water-birds insist on certain biotops, even in migration. Thus water-birds and shorebirds seem to migrate along rivers, as has been observed regularly in Gönyü on the Danube and occasionally in Szentendre, Budapest and Ercsi, also on the same river. Thus the river seems to constitute a directive path of birdmigration .- A. Wolsky.

18070. LACK, DAVID. The behaviour of the robin. Proc. Zool. Soc. London Ser. A. 109(3): 169-219. 1939.—The elicitation of aggressive behavior in the robin is correlated with at least 4 elements in the external situation (flyingaway movement, robin-shape, red breast, song), each of which tends to be associated, but not exclusively, with a particular motor behavior (pursuit-flight, striking, posturing, song). The internal state promoting aggressive behavior also seems complex.—W. E. Collinge.

18071. LEWIS, F. The breeding habits of the lowan in Victoria. Emu 39(1): 56-62. 1939.—A careful study of the lowan or mallee fowl, Leipoa ocellata, during recent years indicates that much of the usually-accepted doctrine regarding its nesting habits is faulty. The eggs when deposited in the mound always stand on the small end. Records of mound temps, and other data are valuable additions to our knowledge of the bird's life history.—P. A. Gilbert.

18072. LINDSEY, ALTON A. Food of the starling in central New York State. Wilson Bull. 51(3): 176-182. I fig. 1939.—Insects constituted 35% of the food in 661 adult (and independent young) starling stomachs, and 77% of that in 139 nestling stomachs. Vegetable matter makes up 41% in adults and 5% in nestlings, while mineral items are 0.8% and 2.2%, respectively. The remainder of the food in each case is animal matter other than insects, including millipedes, unidentified items, and animal garbage. The food habits are decidedly beneficial, especially those of nestlings.—A. A.

18073. LOWE, PERCY R. On the systematic position of swifts (sub-order Cypseli) and humming birds (sub-order Trochili), with special reference to their relation to the order Passeriformes. Trans. Zool. Soc. London 24(4): 307-348. 4 pl., I fig. 1939.—A series of valuable and informative notes in an attempt to once and for all establish the position held by the swifts and humming-birds in the class Aves.—W. E. Collinge.

18074. MOREAU, R. E. Numerical data on African birds' behaviour at the nest: Hirundo s. smithii Leach, the wire-tailed swallow. Proc. Zool. Soc. London Ser. A. 109 (2): 109-125. 1939.—The effect of rain on parent birds' activity is given. Heavy rain reduced feeding activity. Brooding of eggs and young was carried out by the QQ. Incubation period is 14 days; fledging 18-21.—W. E. Collinge.

18075. NICE, MARGARET MORSE. Symposium on the individual vs. the species. 3. The Social Kumpan and the Song Sparrow. Auk 56(3): 255-262. 1939.—Social reactions of Melospiza melodia are considered from the viewpoint of Konrad Lorenz' Kumpan theory. This bird reacts to its companions through suggestion or so-called imitation,

companions through suggestion or so-called imitation, responds to warning, and exhibits despotism which is held in check in the breeding season through the factor of territory.—M. M. Nice.

18076. NOBLE, G. K. Symposium on the individual vs. the species. 4. The rôle of dominance in the social life of birds. Auk 56(3): 263-273. 1939.—There are 2 sharply defined types of dominance in birds: social and sexual. Sexual dominance has the same function in fish and hirds. It calls dominance has the same function in fish and birds. It calls forth posturing or other sexual attitudes. Territory may be sharply divided into different categories. Sexual territory, which is so characteristic of most birds, is, however, found in most egg-laying and nest-building vertebrates. It arises from the sexual interest of the animal in an area suitable for nesting and it functions primarily to test sexual readiness of the opposite sex and to make possible the formation of sexual bonds. Sexual territory is not to be confused with a nesting territory, which has a different motivational basis, nor with an isolated retreat which is defended by many vertebrates against intruders at any season.—G. K. Noble.

18077. NUBLING, E. The painting of the satin bower-bird's bower. Emu 39(1): 22-31. 1939.—An exhaustive ac-

count giving details of individual bowers. The first detailed account of this extraordinary habit appeared in the American Journal of Ophthalmology, 8(2), February, 1925. The author modifies certain statements contained in that article.-P. A.

18078. POLDERBOER, EMMETT B. The summer habits of the ruffed grouse in Iowa. Iowa Bird Life 9(3): 38-41. 1 fig. 1939.—Largely devoted to a study of the type of cover used during the July and Aug. moulting season during which

the birds are flightless.—A. L. Pickens.

18079. ROSENE, WALTER Jr. A preliminary investigation of the food habits of the mourning dove in Alabama. J. S. Dept. Agric. Bur. Biol. Surv. Wildlife Res. and Manag. Leafl. BS-133. 10p. 1939.—In the 287 mourning dove (Zenaidura macroura) stomachs examined, 149 spp. of vegetable food representing 41 plant families were identified, all but 3 families providing food in quantities sufficient to be recorded as one per cent or more of the bird's annual diet in Alabama. More than 99% of the food consisted of seeds. Animal food was insignificant and was probably taken accidentally. The grasses were the most important family as a source of food, the cultivated vars.—corn, wheat, and Johnson grass—ranking first as a group. The most important single native food was seeds of bull paspalum (Paspalum boscianum). Those of crowfoot grass (Dactyloctenium aegyptium) and crabgrass (Digitaria sanguinalis) also were important. Other seeds of importance in the diet were those of pokeweed (Phytolacca americana), chickweed (Alsine media), wild legumes (Galactia and Strophostyles), cowpeas (Vigna sinensis), lespedezas (Lespedeza), doveweeds (Croton), evening-primrose (Raimannia laciniala), and rag-weeds (Ambrosia). A shortage of choice foods apparently occurred in April and May. Preferred feeding places were on bare ground in open situations. The birds were found to concentrate around an abundant food supply. Preferred drinking places were at "watering holes" that had gently sloping banks, devoid of vegetation.—Auth. summ.

18080. SALGUES, R. Contributions nouvelles à la physiologie de la plume. G. La morphologie de la plume comme élément taxinomique. Oiseau 9(1): 51-57. 1939.— (After Chandler, U. of Calif. Pub. in Zool., 13, no. 11: 243-446, 1916.) Feather structure is a valuable taxonomic character. Distribution of plumules is not of much value, due to its variation, and to the adaptive value of the plumules. The presence and form of the hyporachis is a very significant character. The quill is not a dependable character due to its adaptiveness. The barb is a valuable character. The morphology and arrangement of the distal barbules of the flight-feathers is the best taxonomic feather-character. Contour feathers and down-barbules are not good taxonomic characters, except that the length, dimensions, and shape of the base of some of the down-barbules have phylogenetic significance. No single character can suffice as a basis of taxonomy. Evidence from the feathers leads to the following conclusions: the Procellariiformes are closely related to the Ciconiiformes; Plotus and Phalacrocorax should be in separate families; the Phoenicopteri are intermediate between Ciconiae and Anseres; the Phaethontidae are closer to the Laridae than to the Steganopodes; the Alcidae are close to the Laridae, but show some similarity to the Colymbiformes; the Gruiformes (particularly Rallidae and Aramidae) are closer to Limicolae than to Ciconiiformes; Eurypyga and Cariama are probably aberrant Ardeae; Cursorius is nearer to Ardeae than to Limicolae; the Pteroclo-Columbae are closer to the gallinaceous birds than to the laro-limicolines; the Tinamidae are an offshoot of the Galliformes; the Cuculiformes do not differ from Coraciiformes sufficiently to form a separate order; the Trochilidae and Pici are closer to the Passeriformes than to the Coraciiformes; the Galbulidae are not descended from Pici. -D. S. Lehrman.

18081. TICEHURST, CLAUD B. A systematic review of the genus Phylloscopus. (Willow-warblers or leaf-warblers.) With preface by MARTIN A. C. HINTON. viii+193p. 8 maps, 2 col. pl. Printed by order of the trustees of the British Museum: London, 1938, Pr. 10s.— This monograph is based on the collections of the British and other museums numbering 5,000 specimens and on field

experience. Phylloscopus has its present headquarters in the mountain ranges from Kashmir to Ransu with outlying species in Western Asia, Europe, Indo-China, and the Sunda Islands. The author recognises 28 spp. and 53 subspp. Of these he gives a key and a systematic review and for each of them a detailed account including a terse description of the adult, molts and plumage, measurements, weights, wing formula, soft parts, breeding range, migration, winter range, comparisons with related forms in field and museum, and citations of pertinent literature. The author tends to reduce the number of genera by reducing to synonymy those founded on degrees of difference. He finds subspecies living side by side on the same ground. He notes parallel varia-tions in allied species in comparable ranges. The book is a comprehensive, adequate, and well-considered monograph based on ample material and long experience in its analysis, with significant generalizations.—C. A. Kofoid.

18082. WHITLOCK, F. L. Birds of the Bunbury district,

western Australia. Emu 39(1): 47-56. 1939.—An annotated list of birds based on observations over 10 yrs. or more.—

P. A. Gilbert

18083. WRIGHT, EARL G. Marking birds by imping feathers. Jour. Wildlife Management 3(3): 238-239. 1 fig. 1939.—Feathers of any color can be firmly attached to bases of natural feathers by splicing with metal reinforcement.

W. L. McAtee.
18084. WYNNE-EDWARDS, V. C. Intermittent breeding of the Fulmar (Fulmarus glacialis (L.)) with some general observations on non-breeding in sea-birds. Proc. Zool. Soc. London Ser. A. 109(2): 127-132. 1 pl. 1939.—There is a large non-breeding population of Fulmars and other Procellariiform birds, which suggests that they do not breed annually. In non-breeding Fulmars obtained in northern Labrador in July the length of the middle claws varied from 16 to 10.6 mm., due to wear. As pelagic birds, can only wear down their claws when breeding, this observation strongly suggests a non-breeding population of mixed age-groups. Ovaries from 4 representative non-breeding PP were sectioned, and histological confirmation obtained of the relation of claw-length to age. Resorbed remnants of ovulated follicles prove that all these birds had bred in one or many previous years, and thus that their reproduction is intermittent. A case of follicular atresia accompanied by the extrusion of yolk into the stroma is figured. When breeding is inhibited in the Fulmar and certain other birds the annual (post-nuptial) moult occurs prematurely. A short discussion is given of other effects of inhibited breeding in marine birds.—W. E. Collinge.

## MAMMALIA

Editor: GERRIT S. MILLER. Associate Editor: REMINGTON KELLOGG

18085. ALLEN, GLOVER M. Dog skulls from Uyak Bay, Kodiak Island. Jour. Mammal. 20(3): 336-340. 1939.—From an aboriginal site of 4 acres, covered by a deposit believed to date from about the beginning of the Christian era to about the time of Russian occupation (1783), some 30 crania and mandibles were recovered during the excavations under Dr. Ales Hrdlička, representing 2 distinct breeds of dogs, a larger about the size of the Eskimo dog of Greenland, but with a more pinched-in rostrum, and a much smaller breed about the size of a spaniel but differing from most smaller types of dogs in the flatter forehead and nearly complete lack of swellings due to sinusal inflation of the portion between postorbital processes and braincase. A few skulls probably represent mongrels of these two, with disharmonic proportions. Measurements of 29 skulls of this lot are given.

-Ġ. M. Allen.

18086. BAILEY, VERNON. The solitary lives of two little pocket mice. Jour. Mammal. 20(3): 325-328. 1939.— These smallest known pocket mice (Perognathus pacificus) are fairly abundant in the sandy shores and dunes near the ocean in San Diego Co., southern California, but have not been found in the heavy soils a little back from the beaches. A  $\sigma$  and  $\Omega$  were captured near Oceanside in 1931 and kept for study until they died of old age, the  $\Omega$  in 1935 and the 3 in 1937. They were fully adult when captured and must have been at least 5 and 7 years old when they died. Their habits in the field and in captivity were mainly solitary as in most animals that store food, the 2 being aggressively acquisitive, though both were gentle and friendly with people. Their food consisted of a great variety of seeds of native and cultivated plants of which the families Compositae, Leguminosae and Gramineae furnished the staples. They drank water irregularly but became very thirsty if without water or green food for a few days.—V. Bailey.

18087. BEACH, FRANK A. Maternal behavior of the pouchless marsupial, Marmosa cinerea. Jour. Mammal. 20 (3): 315-322. 3 fig. 1939.—A lactating opossum exhibited maternal reactions comparable to those of the parturient rat; she gathered available material to build a nest, and retrieved her scattered young by pushing them under her belly where they could seize the ventral hair and cling to the mammae. Her reactions to the newborn rats were indistinguishable from her responses to her own young; but the rats failed to seize her coat and consequently were not retrieved. Young rats left in the exptl. cage over night were found in her nest

box the following morning.—F. A. Beach.

18088. BENSON, SETH B., and RICHARD M. BOND. Notes on Sorex merriami Dobson. Jour. Mammal. 20(3):

348-351. 1939.—This shrew occurs in California. It intergrades with S. leucogenys, thus reducing leucogenys to the rank of a subspecies of S. merriami.—S. B. Benson.

18089. CARR, A. F. Jr. Notes on escape behavior in the Florida marsh rabbit. Jour. Mammal. 20(3): 322-325. 1939. Observations on some 200 chases of a small number of Florida marsh rabbits (Sylvilagus palustris paludicola) by hounds, in the same area near Newnan's Lake, Florida, in which Blair's 1936 study of the Florida marsh rabbit was made, show that (1) the pursued rabbits are unhurried, moving with a short hop, and often back-tracking or "freezing," allowing the hounds to overrun the trail; (2) what are believed to be single individuals with some regularity follow predictable courses leading to preselected refuges, but the

routes taken are not invariable.—T. H. Hubbell.

18090. COTTAM, CLARENCE, A. L. NELSON, and TAL-BOTT E. CLARKE. Notes on early winter food habits of the black bear in George Washington National Forest. Jour. Mammal. 20(3): 310-314. 1939.—A discussion of early winter food habits of black bears in George Washington National Forest, Virginia and West Virginia, based on examination of the stomach contents of 25 animals. Acorns and fruits of Vaccinium, tupelo (Nyssa sylvatica), grape, chokeberry (Aronia melanocarpa) and greenbrier (Smilax) were found to be the chief items of food, During the early winter, only 3½% of the food consumed was of animal material. During years of acorn failure the bears are forced to feed on fruits to a much greater extent than usual.—A. L.

18091. DEARBORN, NED. Sections aid in identifying hair. Jour. Mammal. 20(3): 346-348. 1939.—Cross sections of mammal guard hairs, made where the hairs are broadest. are frequently distinctive of a family, or even a genus. The medullary pattern and the maximum size of a guard hair are also more or less diagnostic, when taken in connection with cross sections. These features are useful in identifying small mammal hairs found in stomachs and excreta of predators.—N. Dearborn.

18092. FOX, E. H. Some notes on rat control in the Mourilyan area. Queensland Soc. Sugar Cane Technol. Proc. 8: 37-39, 1937.—Over 90% of the field rats in the Mourilyan area of Queensland belong to the species Melomys littoralis.

MILLER; Attacks on porcupine by gray fox (Urocyon cinereoargenteus) and wildcats (Lynx rujus), by RICHARD LEE WEAVER; Notes on the Sierra Nevada flying squirrel (Glaucomys sabrinus lascivus), by VINCENT MOWBRAY; The hand capture of conies (Ochotona), by F. W. MILLER, and Highway mortality of rabbits in Idaho (Anonymous).

18106. SHADLE, ALBERT R., and THOMAS S. AUSTIN. Fifteen months of beaver work in Allegany State Park, N. Y. Jour. Mammal. 20(3): 299-303. 1 fig. 1939.—In one year 2 adult beavers cut 116 trees from 1 to 13 inches in diam., built 705 feet of dam, and constructed a house of 472 cu. ft. volume. From Aug. 11, to Nov. 11, 1938, the adults and 2 kits cut 150 trees 1 to 15 inches in diam., added 150 feet of dam, besides raising other dams, increased the volume of the house from 472 cu. ft. to 940 cu. ft., collected and stored a pile of winter food 30 feet long, 8 ft. wide and 3 to 4 feet deep. The order of food preference was: Populus, Salix, Amelanchier, Carpinus, and Prunus.—A. R. Shadle.

18107. WARREN, EDWARD R., and E. RAYMOND HALL. A new subspecies of beaver from Colorado. Jour. Mammal. 20(3): 358-362. Map. 1939.—Castor canadensis concisor is described; Monument Creek, El Paso County, Colorado, is the type locality.—E. R. Hall.

18108. WOOD, ALBERT ELMER. Additional specimens of the heteromyid rodent Heliscomys from the Oligocene of Nebraska. Amer. Jour. Sci. 237(8): 550-561. 2 pl. 1939.—A collection of specimens of Heliscomys from the Upper Oreodon Beds of western Nebraska adds considerably to our knowledge of this rodent. Associated upper and lower teeth, complete upper and lower dentitions, fragments of the skull, a partial radius and a partial manus, all referable to H. hatcheri, make this the best known species of the genus. This species shows strong resemblances to the early members of the Heteromyinae, to which it is tentatively referred, although all the other species of the genus are referable either to the Perognathinae or to the Dipodomyinae. This material throws no light on the origin either of the Heliscomys tooth pattern, or on that of the Geomyoidea in general.—A. E.

## INTRODUCTORY GUIDE TO THE INDEXES

Users of Biological Abstracts are reminded that this volume covers only a part of the literature published in the period during which the volume was issued. Succeeding volumes must therefore also be consulted for literature more or less contemporaneous with that reported and indexed in this volume.

## SUBJECT AND SYSTEMATIC INDEXES

### GENERAL

These indexes are designed to meet the needs both of those whose interests lie chiefly in systematic groups of organisms and of those whose interests are not circum-scribed in this way. For the former, chiefly systematic biologists, one of the requisite avenues of approach to their subject is by systematic groups; this is provided by the systematic index. Experience has shown that the needs of those concerned with other biological disciplines are most practically met by a detailed analytical subject index alphabetically arranged; an extensive index of this type is therefore provided.

A special effort has been made to design these two indexes as far as possible in such a way that they will complement rather than duplicate each other. Certain departures from standard indexes will therefore be noted. Chief among these is the policy in the systematic index of carry-

ing the indexing only to genera, not to species.

This arrangement will be convenient for systematists as well, especially when seeking information concerning a limited number of given genera; under these circumstances the subject index will be found the more satisfactory, making consultation of the systematic index in such cases unnecessary. When, however, more comprehensive and extended systematic orientation is desired, the systematic index provides a complete condensed approach by groups and their subgroups down to and including genera.

### THE SUBJECT INDEX

(p. 1894 to end)

This index is based upon an analysis of the abstract, not

merely the title.

The words, terms, and expressions currently used for the same or closely related subjects vary greatly. If the indexing is done according to the particular words used by authors, much scattering of material concerning the same subject obviously results. Therefore the effort has been to index subjects and not merely words, and, where necessary, provide cross references which will lead the user from words commonly used to the rubrics under which the pertinent material has been assembled. Thus, studies on blood sugar are indexed under that rubric, not under "Hypoglycemia," "Hyperglycemia," or other terms used by authors to denote variations in blood sugar; because of their frequent use, however, "Hypoglycemia," "Hyperglycemia," etc., are entered in their respective alphabetic positions with cross references to "Blood sugar." Similarly, word indexing frequently control programments. ing frequently scatters material referring to the same species; thus, material concerning the domestic fowl would appear under such diverse rubrics as hen, cock, pullet, capon, fowl, chicken, chick, etc.

While an effort has been made through subject indexing to avoid in a large measure the scattering resulting from word indexing, the index is, in the main, not a classified one. Since ease of use rather than strict logic is demanded of an index, the indexing so far as possible is done under the rubrics under which it is thought the majority of users are most likely to search. To this extent the index is

frankly opportunistic. Thus the index contains rubrics for "Antibodies," "Antigens," "Complement," "Toxins," "Vaccines," etc., instead of relegating all to subordinate positions under some general rubric, e.g., "Immunity." Since tions under some general rubric, e.g., "Immunity." Since individual researches tend to be highly specialized, this general policy is believed to result usually in greater con-

venience to investigators.

This policy necessarily places closely related subjects in more or less widely separated alphabetical positions, and since the index should be useful not only to the specialist but also to those who wish a more comprehensive orientation in a wider field, cross references have been liberally employed to lead users to related material. Also, when the nature of the material has made it possible, the informanature of the material has made it possible, the information has not only been entered under, for instance, the specific name of the substance, but has been listed again under the class or group to which it belongs. For example, the papers which deal with cyanides as fumigants appear with detailed entries under "Cyanides," as: "Cyanides, as fumigants, in black scale control, . . . 14980," and are listed again, by number only, under "Fumigants," as: "Fumigants, cyanides as, . . . . 14980." Similarly, papers on specific stains are entered in detail under the name of the stain, e.g., "Methylene blue," etc., and listed again by number only under "Stains." Cyanides and methylene blue cannot, however, be made exclusively subrubrics of "Fumicannot, however, be made exclusively subrubries of "Fumigants" and "Stains," respectively, because of their importance in other directions.

There are some cases, however, in which there seems to be no necessity for thus scattering related material; especially in cases where there is an anatomical basis for grouping, material has been entered only under the larger group heading. Thus the bones, muscles, nerves, and the various parts of the brain are listed under "Bone," "Muscle," "Nerve," "Brain," rather than under "Ulna," "Sartorius," "Phrenic," "Amygdala," "Restiform body," etc.

Under very broad rubrics only those papers are in general indexed which themselves are broad in content or point of view. Thus, under "Physiology," "Pathology," "Cytology," "Horticulture," "Ecology," etc., will usually be found indexed only books or other general treatments; to do otherwise would make these headings unwieldy and more or less coextensive with the corresponding abstract

sections.

### Indexing under names of organisms

In general, indexing is done under the scientific name used in the original; i.e., no attempt is made to select the name that might be considered correct under the rules where two or more names are in current use. This results in some scattering of references pertaining to the same organism, notably among bacteria, where several systems of nomenciature are current. However, specialists will know what names to consult in such cases; also, a limited amount of cross referencing is provided.

When common names only are used in the original, the indexing as a rule is done under these; allocation to genera would in many cases be difficult and introduce errors. Thus, if merely "Clover" appears in the original, it is indexed under that name rather than under the genus Trijolium, since the plant in question may belong to some other of the several genera members of which are known as "Clovers." Where, however, there is no room for doubt as to the proper scientific name of an organism or group mentioned only by common name in the original, indexing may be done under the scientific name. Between common names and their possible, probable, or certain corresponding generic names, cross references have been provided in a limited number of cases.

Since the same generic name is sometimes used for both plants and animals, the alphabetical arrangement used in the subject index throws these together. In most cases these have been separated. Occasionally, however, the species listed under a generic name will be in part animal and in part plant; reference to the corresponding abstracts at

once distinguishes between them.

Studies, especially experimental, on common laboratory animals (guinea pig, mouse, rat, rabbit, dog, cat, etc.) are in general not indexed under the name of the animal; the same applies to man, especially in the fields of physi-

ology, pathology, and anatomy.

In view of the extensive systematic index, the indexing in the subject index is usually not done under group names above the rank of genus. Occasionally it appears desirable to insert references under larger group names, often in anglicized form, e.g., "Diatoms," "Fishes," etc. However, every supergeneric group recognized and represented in the systematic index appears in the subject index in Roman type; the page number following refers to the page of the systematic index on which the group is treated, and the exponential figure attached to the page number refers to the column.

Similarly, the page and column references appearing after generic names refer to the exact places in the systematic index where these genera are treated systematically. It is thus possible to determine instantly the classification of any genus occurring in the alphabetical subject index which appears also in the systematic index. For example, the genus Anopheles in the alphabetic subject index is followed by "(p. 1877)"; reference to this page and column in the systematic index discloses that the genus falls in

the family Culicidae, order Diptera, class Insecta.

Through the policies outlined in the two paragraphs preceding it is apparent that the subject index provides at the same time a complete alphabetical index to the systematic index. It is thus possible for users of the alphabetical subject index to orient themselves systematically as to both genera and supergeneric groups, thereby facilitating the utilization of systematic information—especially by those who find it difficult to do so when only a systematic approach is available. Furthermore, the user is at once put in touch with related genera and groups and the information recorded concerning them, thereby simplifying the problem of approaching a special problem against a background of broad orientation.

### Typography

All generic names are in *italic type* (the only exceptions are new genera and subgenera, which appear in bold-faced capitals); all other first words in rubrics are in ordinary Roman type. This will be found convenient: if the search is for a generic name, all roman type rubrics can be ignored; if the search is for any other subject rubric, all italic names can be passed by automatically.

New genera and subgenera are printed in bold-faced capitals, e.g., ARENIGOBIUS. Categories below the rank of genus are not indexed in first position, the sole exception

being new subgenera.

For reasons of economy the indexing of new taxonomic units below the rank of genus has been greatly curtailed. We have endeavored to lead the user to the desired information in the abstract without duplicating that information in the indexes. Only a few of the new species, varieties, forms, combinations, and reductions to synonymy have been mentioned specifically in the index. If mentioned they are printed as follows:

New species, varieties, etc., appear in lower-case bold-faced type, e.g., Anopheles broussesi, Carex capillaris v. parvirostris.

New specific, varietal, etc., names proposed to replace preoccupied names are printed in lower-case bold-faced type, with the replaced combination following in parentheses and in italic; e.g., Bitoma novella (B. maura). If the preoccupation is the result of transferring a species from one genus to another, thus involving two generic names, the replaced binomial is also entered in first position, in italic, followed in parentheses by the new binomial (the new name appearing in lower-case bold face); e.g., Corixa dubia (Sigara paivai).

In new combinations (e.g., transfers of members from one genus to another), the specific name appears in lowercase bold-faced type, followed in parentheses and in italic by the genus from which the member is transferred; e.g., Anneslia anomala (Inga). The old combination is also entered in first position, but wholly in italic, followed in parentheses and in italic by the genus to which the transfer is made: Inga anomala (Anneslia). If in making the transfer any change in specific, varietal, etc., names is made, the full combinations are given.

made, the full combinations are given.

In the abstracts new synonyms are preceded by an equality sign and placed in parentheses; the name under which the synonym is sunk precedes, e.g., Sympronoe parva

(Claus) (=S. anomala Shoemaker).

A dagger (†) associated with a plant or animal name indicates that it is a fossil. The abbreviations in parentheses signify geological periods, as follows:

(Cb)	= Carboniferous	(N) = Neogene
(Cm)	= Cambrian	(O) = Ordovician
(D)	= Devonian	(Pl) = Pleistocene
(E)	= Eogene	(Pr) = Permian
(J)	= Jurassic	(S) = Silurian
(K)	= Cretaceous	(Tr) = Triassic

Some necessary variations from the above will be self-explanatory.

In the abstracts an asterisk (\*) attached to a name indicates that the form is illustrated.

## THE SYSTEMATIC INDEX

(pp. 1860-1883)

The indexing in the systematic index is limited to those disciplines in which the interest is more or less strongly by systematic groups, notably the taxonomic and morphological. The indexing is confined at present to the following subjects, the references being grouped correspondingly under the abbreviations given in parentheses:

Morphology, including anatomy (MORPH.) Histology (HIST.) Cytology (CYT.) Embryology (EMB.) Life History (L. H.)
Phylogeny (PHYL.)
Geographical distribution (DIST.)
Bibliography (BIBL.)
Taxonomy (TAX.)

In departure from the policy of previous years, all taxonomic information, of whatever character—including the description of new species, subspecies, varieties, forms, aberrations, etc., and the publication of new names, new combinations, and new reductions to synonymy (but not including the erection of new genera or of supergeneric groups)—is assembled under the category TAX.

Superspecific entities (subgenera, genera, and higher groups) proposed as new to science are listed by name in bold-faced capitals, e.g., NOBOLIRA. New genera appear in alphabetic order among the other genera of the particular group; new subgenera are indented under the corresponding genera; in new supergeneric groups the exact position of the names varies somewhat, depending upon the rank of the group and whether the name is merely indexed or whether utilized by the editor for arranging subordinate groups under it. All new superspecific group names, except genera, are accompanied by a statement of

the rank assigned to them by the authors, e.g., n. subg., n. ord., etc.

Certain fossil genera of very doubtful position, or form genera of broad scope, are omitted from the systematic index; they are, however, included in the subject index.

Geographical distribution (DIST.) is in general entered in the systematic index only when treated more or less comprehensively or when data of apparently peculiar interest are presented. Some variation in this policy will be noted. Geographical distribution is, however, indexed fully by groups under geographical and political units in the Geographical Index (see below). This, it is believed, will be found useful because the interest in much recorded distributional information is local. However, by consulting the Geographical Index the student desiring more exhaustive information regarding distribution will be able to assemble easily the desired references.

Papers treating a group (family, order, etc.) more or less comprehensively from some point of view (morphology, taxonomy, cytology, etc.) are frequently indexed under the broader group, though they may also be entered under individual genera. However, new species, new varieties, new combinations, etc., are invariably referred to under the genera.

Genera are arranged alphabetically under groups, and are therefore easily located. If, on the other hand, the systematic index is consulted for subjects—cytology, embryology, life history, etc.,—the distinctive type used for the abbreviations renders the assembling of references from

this point of view almost equally simple. The systems of classification used in the various groups are determined by the editors in charge of the respective sections. In general the policy is to use conservative modern classifications; also, to omit intermediate groups, especially subfamilies (a few large families in Lepidoptera being the only exceptions). Since the purpose of the systems here used is chiefly to facilitate the location of desired information, it is believed that the omission of these taxonomic refinements will contribute to, rather than detract from, the utility of the index; furthermore, these refinements are more likely to be fluctuating and controversial, involving changes in successive volumes confusing to the user of the indexes.

## GEOGRAPHICAL AND GEOLOGICAL INDEXES

### THE GEOGRAPHICAL INDEX

(pp. 1884-1892)

This index is devoted to the indexing of geographical information, particularly the geographical distribution of organisms

The various geographical areas adopted as units for indexing purposes are grouped under the following major headings: North America, South America, Europe, Africa, Asia, Malay Archipelago, Australasia, Antarctica, Oceanic Islands, and Oceans. The arrangement of the areas under each of these major headings is alphabetical except in the case of North America, where the countries are arranged in a general north-to-south sequence. The subdivisions of any country, such as the provinces of Canada or the separate states of the United States, are arranged alphabetically under that country.

Under each geographical area or unit, organisms are listed by group names arranged alphabetically and corresponding approximately to the systematic sections of current abstract issues; e.g., "Coleoptera," "Fungi," "Mammalia," etc. Items of information pertaining to geographical distribution, but not readily classifiable by systematic groups, are entered in the index above the systematic group names.

A limited amount of indexing is done under the larger geographical units (e.g., West Indies; Europe; Africa, northern), either because the papers in question treat the area more or less comprehensively or because the locality data are not sufficiently specific in the original to permit of more circumscribed allocation.

The names of all geographical areas or units adopted for indexing purposes are printed in their proper places in this index. A few, however, are followed by no abstract numbers; this indicates that the current volume contains no material for indexing under those names.

For indexing purposes, it is a general policy to include coastal islands with near-by mainland countries rather than with oceanic island groups. Likewise coastal waters, up to the 100-fathom line, are generally included with the adjoining mainland. Oceans include adjoining gulfs, bays, and smaller seas. For the most part, only aquatic organisms are indexed under oceans. For abstracts dealing with organisms of a certain kind of distribution, such as coastal fishes (Pisces) or pelagic birds (Aves), references may be given both under an ocean and under a land area.

A dagger (†) preceding an abstract number indicates that the abstract deals with a fossil organism or organisms.

Various letter symbols in parentheses signify geological periods, as follows:

(Cb)	= Carboniferous	(N)	= Neogene
(Cm)	= Cambrian	(0)	= Ordovician
(D)	= Devonian	(Pl)	= Pleistocene
(E)	= Eogene	(Pr)	= Permian
(J)	= Jurassic	(S)	= Silurian
(K)	= Cretaceous	(Tr)	= Triassic

Additional information on the distribution of organisms, as far as it pertains to the geological occurrence of fossil species, is indexed in the Geological Index under the names of the geological periods on page 1803

of the geological periods, on page 1893.

Abstract numbers in bold-faced type indicate that new taxonomic concepts (e.g., new species or subspecies) are proposed in the papers referred to.

## THE GEOLOGICAL INDEX TO PALEONTOLOGICAL MATERIAL

(p. 1893)

This index is devoted to the indexing of paleontological information on the basis of the geological time scale. The sequence progresses from older to younger strata by eras and periods. Under each period organisms are listed by group names arranged alphabetically and corresponding approximately to the systematic sections of current abstract issues, e.g., "Crustacea," "Gymnospermae," "Mammalia," etc.; the only important exception is represented by "Insecta," the orders of which are not separated. For a detailed systematic approach to paleontological material the Systematic Index (pp. 1860-1883) should be consulted.

A limited amount of indexing is done under the eras, either because the papers in question are more or less comprehensive or because the geological data are not sufficiently specific in the original to permit of allocation to periods.

In general, geographical locations are not included; for a geographical approach to paleontological material, the Geographical Index (pp. 1884-1892) should be consulted.

For an alphabetical approach to fossil forms, the Subject Index (p. 1894 to end) should be consulted.

Abstract numbers in bold-faced type indicate that new taxonomic concepts (e.g., new species or subspecies) are proposed in the papers referred to.

# SYSTEMATIC INDEX

(For introductory guide see pages 1812-1813)

# PLANT KINGDOM

PHYL., 2905

## ALGAE

DIST., (†) 2784; MORPH., 1586, 6832; TAX., 1586, 11809

(Classification according to Engler and Prantl, "Die Natürlichen Pflanzenfamilien," 2nd ed., sup-plemented where yet incomplete by the 1st ed., and by Pascher, "Sussvasserflora Deutschlands, u. s. w.," and other sources.)

# MYXOPHYCEAE

TAX., 1064

#### ARCHIPLASTIDEAE

COCCOGONEALES

CHROOCOCCACEAE
Aphanocapsa, TAX., 8385
Aphanothece, TAX., 8385
Chroococcus, TAX., 8385
Gloeocapsa, TAX., 8385
Merismopedia, TAX., 8385
Microcystis, TAX., 8385
Oncobyrsa, TAX., 8385
Synechococcus, TAX., 8385
Synechocystis, TAX., 8385

CHAMAESIPHONACEAE Chamaesiphon, TAX., 8385 Stichosiphon, TAX., 8385

#### HORMOGONEALES

OSCILLATORIA CEAE
Hypheothrix, TAX., 15437
ryngbya, TAX., 8385
Socillatoria, TAX., 8385
Phormidium, TAX., 8385
Porphyrosiphon, TAX., 1064
Sehizothrix, TAX., 8385, 15437
Spirnlina, TAX., 8385
Symploca, TAX., 8385

NOSTOCACEAE Anabaena, TAX., 8385, 10104, 15437 Jylindrospermum, TAX., 8 Nostoc, TAX., 8385, 15487 8385

MICROCHAETACEAE

SCYTONEMATACEAE lcytonema, TAX., 8385, 15437 Colypothrix, TAX., 15487

STIGONEMATACEAE Pischerella, TAX., 2789, 8385 Japalosiphon, TAX., 8385 Jastigocladus, TAX., 8385 Stauromatonema, MORPH., 8377

RIVULARIACEAE Calothrix, TAX., 8385, 15437 Rivularia, L. H., 16262

# CHLOROPHYACEAE

TAX., 2791, 6330

PROTOCOCCALES

VOLVOCACEAE CYT., 7116; TAX., 10106 Chlorogonium, TAX., 2789 Platydorina, DIST., 1071 Polytoma, CYT., MORPH., 10107 Volvox, L. H., MORPH., 8378; TAX., 2789, 8378

CHLOROCOCCACEAE Characium, TAX., 2789, 6331 Sykidion, TAX., 6381

OOCYSTACEAE Prototheca, TAX., 6327

COELASTRACEAE CORONASTRUM, 4732

CHAETOPHORALES SAPROCHAETACEAE, FAM., 15433; Prasiolaceae, TAX., 1070

SAPROCHAETACEAE SAPROCHAETE, 15433

ULOTRICHACEAE Ulothrix, L. H., 2807

ULVACEAE ULVACEAE
Codium, TAX, 2793
Enteromorpha, CYT., MORPI
TAX., 13725; L. H., 8381
Monostroma, L. H., 8381
Ulva, L. H., 8381; TAX., 2793 MORPH.

CHAETOPHORACEAE Bulbocoleon, L. H., 8378 Gomontia, DIST., 11805 Stigeoclonium, TAX., 2789

**OEDOGONIACEAE** Oedogonium, TAX., 6333

SIPHONOCLADALES CLADOPHORACEAE Cladophora, TAX., 2793 Urospora, TAX., 2793

DASYCLADACEAE MORPH., Acetabularia, 10103

SIPHONALES BRYOPSIDACEAE Bryopsis, TAX., 2793

CAULERPACEAE Caulerpa, TAX., 2793

DERBESIACEAE Derbesia, TAX., 8382

INCERTAE SEDIS INCERTAE SEDIS (In Siphonales) Acicularia, TAX., (Ter) 17482 Cymopolia, TAX., (Ter) 17482 Neomeria, TAX., (Ter) 17482 Vaginopora, TAX., (Ter) 17482

CONJUGALES

DESMIDIACEAE Cosmarium, TAX., 2789, 11808

ZYGNEMATACEAE Spirogonium, L. H., 8375 Spirogyra, L. H., 1082

CHARALES CLAVATORACEAE, FAM., (J) 17481

CHARACEAE Chara, TAX., (Pl) 17483 Nitella, TAX., (Pl) 10102

CLAVATORACEAE Clavator, TAX.. (J) 17481 PERIMNESTE, (J) 17481

INCERTAE SEDIS
(In Charales)
Characeites, TAX., (J) 17481
CHARAXIS, (J) 17481

INCERTAE SEDIS (In Chlorophyceae)
Algacites, TAX., (J) 17481
CAYEUXIA, (†) 15428

# XANTHOPHYCEAE (HETEROKONTAE)

HETEROCOCCALES BOTRYOCOCCACEAE Botryococcus, DIST., MORPH., (†) 13719

HETEROTRICHALES

TRIBONEMACEAE Tribonema, DIST., L. H., 13737

CHLOROMONADO-PHYCEAE (CHLOROMONAD-ALES)

(No material)

## EUGLENOPHYCEAE (EUGLENALES)

(No material)

# CHRYSOPHYCEAE

CHRYSOMONADALES CHROMULINACEAE Chrysococcus, TAX., 2792

# DINOPHYCEAE

(See Dinoflagellida, under Protozoa, p. 1868<sup>1</sup>)

#### BACILLARIOPHY-CEAE (DIATOMACEAE)

DIST., (†) 2782 PENNALES EUNOTIACEAE Eunotia, TAX., 8376

NAVICULACEAE Navicula, TAX., 8376 Stauroneis, TAX., 8376

# **PHAEOPHYCEAE**

TAX., 13724

PHAEOSPORALES Ectocarpales, TAX., 11804

ECTOCARPACEAE Ectocarpus, TAX., 2793 FELDMANNIA, 11804 KUCKUCKIA, 11804

ASPEROCOCCACEAE Colpomenia, TAX., 2793

ELACHISTEACEAE Septonema, L. H., 11819

LITHODERMATACEAE Lithoderma, TAX., 11806

CYCLOSPORALES LAMINARIACEAE Arthrothamnus, L. H., MORPH., Chorda, L. H., MORPH., 8374 Eisenia, CYT., MORPH., 6328 Kjellmaniella, L. H., MORPH., 8374 Laminaria, L. H., MORPH., 8374 Nereocystis, MORPH., 4728

FUCACEAE Fucus, MORPH., 2790 Sargassum, TAX., 8384

INCERTAE SEDIS (In Phaeophyceae) LITHODORA, 10105

#### RHODOPHYCEAE

PHYL., 2794

#### FLORIDEAE

NEMALIONALES

HELMINTHOCLADIACEAE Liagora, TAX., 8380

LEMANEACEAE Lemanea, DIST., 8379

CHAETANGIACEAE Scinaia, TAX., 8384

GIGARTINALES GELIDIACEAE

Caulacanthus, MORPH., 1065 Gelidium, TAX., 4729

GIGARTINACEAE

Callymenia, TAX., 8384 Phyllophora, TAX., 4729, 13726

#### RHODYMENIALES

RHODYMENIACEAE Epymenia, TAX.. 13726 Rhodymenia, TAX.. 13726 Sarcodia, TAX., 8384 Sebdenia, TAX., 8384

DELESSERIACEAE Erythroglossum, TAX., 8384

RHODOMELACEAE Endosiphonia, TAX., 15435 Hutchinsia, TAX., 4729 Spirocladia, TAX., 15436 Streblocladia, TAX., 4729

CERAMIACEAE Callithamnion, TAX., 13726 Plumaria, CYT., MORPH., 13722 Spermothamnion, TAX., 8382

CRYPTONEMIALES GRATELOUPIACEAE Grateloupia, TAX., 4729, 8384

NEMASTOMACEAE Schizymenia, TAX., 4729

SQUAMARIACEAE Hildenbrandia, MORPH., 8377

INCERTAE SEDIS (In Rhodophyceae) SELKIA, 10105

# INCERTAE SEDIS

(In Algae) Ceratodiscus, TAX., 15434 GLOBULINEA, (†) 4127

# SCHIZOMYCETES

# MYXOMYCETES

# FUNGI (including LICHENES)

# **SCHIZOMYCETES** (BACTERIA)

TAX., 2767, 17468 EUBACTERIALES MORPH., TAX., 17460

COCCACEAE Staphylococcus, L. H., 12216 Streptococcus, L. H., 12216

SPIRILLACEAE SPOROVIBRIO, 6320

BACTERIACEAE
TAX., 1061, 6299
Achromobacter, TAX., 2745
Bacillus, L. H., 12216, 15989;
TAX., 15423
Bacterium, TAX., 11728
Brucella, L. H., 12216
Listerella, MORPH., 4704

BACILLACEAE

CYT., L. H., MORPH., 11789;
TAX., 6300

Bacillus, MORPH., 13701; TAX.,
4708, 4719, 11800

Clostridium, MORPH., 4708;
TAX., 1054, 4697, 4708

Plectridium, TAX., 13673

AZOTOBACTERIACEAE Azotobacter, TAX., 10072

Azotobacter, TAX., 10072

ENTEROBACTERIACEAE
TAX., 8362
Aerobacter, TAX., 17448
Bacterium, MORPH., 8363; TAX., 15413
Erwinia, TAX., 6299
Pseudosalmonella, TAX., 17378
Salmonella, TAX., 10083, 11635, 15417
Shigella, TAX., 8355

PARVOBACTERIACEAE Hemophilus, TAX., 10085 MORAXELLA, 10085 Pasteurella, TAX., 6315, 13605

Pasteurena, IRAL, 6020, PSEUDOMONADACEAE Phytomonas, TAX., 6299 Pseudomonas, TAX., 6274, 15418 Vibrio, MORPH., 6320 XANTHOMONAS, 15413

RHIZOBIACEAE Chromobacterium, TAX., 17450 Rhizobium, MORPH., 4701, 17421

NEISSERIACEAE Neisseria, TAX., 2776

ACTINOMYCETALES ACTINOMYCETACEAE Actinomyces, MORPH., 4644 Erysipelothrix, MORPH., 4704

MYCOBACTERIACEAE Mycobacterium, L. H., MORPH., 8364; TAX., 2748

CHLAMYDOBACTERIALES CHLAMYDOBACTERIACEAE ANACAMPTOTHRIX, 1057

THIOBACTERIALES BEGGIATOACEAE THIONEMA, 8359

> **SPIROCHAETALES** PHYL., 8899

SPIROCHAETACEAE Leptospira, TAX.. 13610, 17292 Spirochaeta, TAX.. 964, 14192 Treponema, MORPH., 4706; TAX., 11633

INCERTAE SEDIS (In Schizomycetes)
Bartonella, TAX., 14175
Rickettsia, PHYL., 8899; TAX.,

## MYXOMYCETES

DIST., 2800, 2811, 4748; TAX., 15472

**PHYSARALES** PHYSARACEAE Fuligo, L. H., 1085, 6361 DIDYMIACEAE Didymium, DIST., 1084, 4748; MORPH., 1586, 4743; TAX.,

STEMONITALES STEMONITACEAE Stemonitis, L. H., 6361

CRIBRARIALES

RETICULARIACEAE Enteridium, L. H., 1085, 6361 Reticularia, L. H., 6361

TRICHIALES ARCYRIACEAE Arcyria, L. H., 1085

DICTYOSTELIACEAE Dictyostelium, L. H., 6362

INCERTAE SEDIS (In Myxomycetes) Sappinia, L. H., MORPH., 11832

# FUNGI

BIBL., DIST., 2811; MORPH., 6332; TAX., 9977

SPHENISCIDAE Eudyptes, DIST., L. H., MORPH., 10641; TAX., 7001

#### GAVIIFORMES

GAVIIDAE Gavia, L. H., 9064

#### COLYMBIFORMES (PODICIPEDIFORMES) COLYMBIDAE

(PODICIPEDIDAE) Colymbus, DIST., 8844; L. H., 8844, 9064
Podiceps, L. H., 5171

### **PROCELLARIIFORMES**

Thalassidromidae, TAX..

DIOMEDEIDAE Diomedea, DIST., 10646; L. H., 9064, 10646; MORPH., 4369

PROCELLARIIDAE Fulmarus, L. H., 18084 Pachyptila, MORPH., 5183 Petrodroma, DIST., 5188 Puffinus, DIST., 16090; EMB., 4384; L. H., 9064

HYDROBATIDAE Oceanodroma, DIST., 5188

# PELECANIFORMES

PHAETHONTIDAE Phaethon, DIST., 7007

PELECANIDAE Pelecanus, MORPH., 5196

SULIDAE , L. H., 163; L. H., 168, 169; TAX., 1651 Sula,

PHARACROCORACIDAE Phalacrocorax, L. H., 5201

ANHINGIDAE Anhinga, DIST., TAX., 7022

#### CICONIIFORMES

ARDEIDAE Ardea, DIST., 5191, 14296, 14305; HIST., 4359; L. H., 9064, 14305 Botaurus, L. H., 5179

THRESKIORNITHIDAE Ajaia, L. H., 9064

#### ANSERIFORMES

L. H., 14301, 14302

ANTATIDAE L. H., 8841, 8844 Anser, L. H., 9064 Arctonetta, DIST., 1644 Branta, DIST., 16088; L. H., Branta, DIST., 16088; L. 9064 Cygnus, DIST., 16088; L. 9064; MoRPH., 705 Marcca, L. H., 9064 Mergus, DIST., L. H., 5205 Nettion, L. H., 9064 Nyroca, DIST., 9068 Philacte, L. H., 9064 Querquedula, L. H., 10815 Somateria, L. H., 8844 L. H.,

#### **FALCONIFORMES**

ACCIPITRIDAE Accipiter, DIST., 14296, 14806; TAX., 14306 Buteo, L. H., 9064, 14312 Circus, DIST., L. H., 14292 Haliacetus, DIST., 8828; L. H., 9064 Rostrhamus, L. H., 906 Urubitinga, L. H., 9064

FALCONIDAE Falco, DIST., 8853, 14296; L. H., 9064 Herpetotheres, TAX., 1651

# GALLIFORMES

DIST., L. H., TAX., 8851

MEGAPODIIDAE Leipoa, L. H., 18071 Megapodius, TAX., 7014

CRACIDAE Ortalis, L. H., 9064

Bonasa, L. H., 3054

Bonasa, L. H., 3539, 14435, 14436

Canachites, TAX., 16105

Centrocercus, L. H., 9067

Lagopus, DIST., TAX., 8851; L.H., 8858, 14299

Falcipennis, TAX., 16105

Falcipennis, TAX., 16105

PHASIANIDAE

Afrepavo, TAX., 6941
Colinus, L. H., 5230, 9064, 9066
Coturnix, DIST., 5186
Gallus, CYI., 7111; EMB., 699,

5885; MORPH., 757, 759,
5914, 7984, 16974

Lophophorus, TAX., 16077

METALLOPHASIS, N.
SUBG., 16077

METALLOPHASIS, SUBG., 16077 Lophortyx, L. H., 1878, 10818 Perdix, L. H., 164 Phasianus, L. H., 1879, 14436 Synoicus, DIST., 5186

#### GRUIFORMES

Turnix, TAX., 7015

RALLIDAE L. H., 8841 Amaurornis, DIST., MORPH.. 7022 Coturnicops, DIST., 18059 Megacrex, DIST., TAX., 7022 Rallus, TAX., 7015

OTIDIDAE Heterotetrax, DIST., TAX., 7023

#### CHARADRIIFORMES

JACANIDAE Jacana, TAX., 1651

CHARADRIIDAE CHARADRIDAE Anarhynchus, DIST., L. H., 5192 Charadrius, TAX., 7015 Chettusia, DIST., L. H., 16073 Squatarola, DIST., L. H., 16073 Thinornis, DIST., 18060 Vanellus, L. H., 9064

SCOLOPACIDAE

SCOLOPACIDAE L. H., 8841 Actitis, L. H., 10644 Capella, L. H., 10644, 16078 Numenius, DIST., L. H., 16078 Phaeopus, L. H., 9064 Tringa, DIST., 16073

LARIDAE Chlidonias, DIST., 14300 Larus, EMB., 4383 Sterna, DIST., 8850; EMB., 4383; L. H., 5413, 8850, 14307; TAX., 7017

ALCIDAE Aethia, L. H., 9064 Endomychura, DIST., TAX., 5176

#### COLUMBIFORMES

COLUMBIDAE COLUMBIDAE Columba, L. H., 9064 Ectopistes, L. H. 9064 Geopelia, DIST., TAX., 7022 Leptotila, L. H., 9064 Ptilinopus, DIST., TAX., 7022 Streptopelia, DIST., L. H., 8848

#### **PSITTACIFORMES**

PSITTACIDAE Conuropsis, L. H., 9064 Purpureicephalus, DIST., MORPH., TAX., 5199 Rhynchopsitta, L. H., 9064

#### CUCULIFORMES

CUCULIDAE L. H., 8841 Coccyzus, L. H., 9064 Cuculus, L. H., 9064

### STRIGIFORMES

TYTONIDAE Tyto, DIST., 14296

STRIGIDAE STRIGIDAE
Bubo, DIST., 8853
Cryptoglaux, L. H., 5198
Glaucidium, MORPH., 7035
Otus, DIST., 10651; TAX., 10651,
18061
Strix, DIST., 14296; L. H.,
3536; MORPH., 4328

# CAPRIMULGIFORMES

CAPRIMULGIDAE Nyctidromus, L. H., 9064

#### MICROPODIFORMES

MICROPODIDAE Apus, DIST., 14296

TROCHILIDAE TROCHILIDAE Cynanthus, L. H., 9064 Eugenes, L. H., 9064 Hylocharis, L. H., 9064 Lampornis, L. H., 9064 Selaphorus, L. H., 5193

#### TROGONIFORMES

TROGONIDAE Pharomachrus, L. TAX. 16063 Trogon, L. H., 9064

#### CORACHFORMES

ALCEDINIDAE Alcedo, DIST., 14296 Ceryle, MORPH., 9775 Halcyon, TAX., 7013 Megaceryle, L. H., 170, 10652 Sauromarptis, DIST., TAX., 7022 Syma, DIST., TAX., 7022

#### **PICIFORMES**

CAPITONIDAE Cyanops, DIST., TAX., 10638

PICIDAE Campephilus, L. H., 9064, 12437 Ceophloeus, L. H., 12437 Dryohates, DIST., 7026, 8827; L. H., 7026, 12437; TAX., 8827 Sphyrapicus, L. H., 12437

#### **PASSERIFORMES**

TAX., 18065, 18073

TYRANNIDAE Cnemotriccus, DIST., TAX., 7036 Empidonax, L. H., 9064 Mitrephanes, DIST., 7036 Myiarchus, DIST., TAX., 7036; L. H., 9064 Myiodynastes, L. H., 9064

MENURIDAE Menura, L. H., TAX., 16084

ALAUDIDAE AbaUDIDAE Anacorys, DIST., TAX., 7023; L. H., 5197 Calendulauda, DIST., TAX., 7023 Chersomanes, DIST., TAX., 7023 Pseudammomanes, DIST., TAX., 7023

HIRUNDINIDAE DIST., L. H., 8831 Hirundo, DIST., 5207, 8845, 14296; L. H., 18074; TAX., 8845 Petrochelidon, TAX., 1649

DICRURIDAE Dicrurus, DIST., MORPH., 7022

CORVIDAE Aphelocoma, TAX., 16100 Corvus, DIST., 14296 Garrulus, DIST., 14296 Pica, DIST., 8837, 14296; TAX., 8837 Xanthoura, L. H., 9064

PARADISEIDAE Ailuroedus, DIST., L. H., 5185 Cicinnurus, L. H., 7022 Manucodia, L. H., 7022

PARIDAE Parus, DIST., 14296 Psaltriparus, TAX., 1650

SITTIDAE Sitta, L. H., 7021; TAX., 1642

TIMELIIDAE
Aethocichia, DIST., TAX., 7023
